Fire retardant plywood, 100% water proof,
Marine grade, IS:5509, IS:710
Made with 100% hard wood, eucalyptus core and panel

Hippo FIRESECURE fire retardant plywood is treated with special fire retardant chemicals at the time of manufacturing, so that it becomes better at resisting fires. Hippo FIRESECURE fire retardant plywood is made as per IS:5509 specifications that ensures the rate of burning of the plywood should be more than 20 minutes, the time taken for flames to penetrate the plywood has to be more than 30 minutes.

It is commonly used in public places, where the risk of fire has to be reduced such as for making the woodwork in the kitchens of large restaurants, or for the interior woodwork done in public theatres and halls, and the wood used in the railway compartments of our trains. It can also be used in homes and offices, for car interiors, and any other such places where the risk and spread of fire has to be reduced. The addition of fireproofing chemicals, gives the plywood better fire proofing qualities such as:

- Lesser tendency of spark and ignite.
- Slow burning, having a decreased tendency of the fire to spread over the surface of the plywood.
- Low flammability and lesser smoke generation. .
- Higher flame penetration time.

100% water proof.
Marine grade. IS:710 Made with 100% Gurjan core and panel

Hippo REGALIA 900 Plywood is manufactured using imported gurjan core veneer and face veneer in India's most advanced factory equipped with ultra modern machines.

Hippo REGALIA 900 Plywood is 4 times pressed under the controlled heat of 150°C and extreme pressure to compress the veneer-resin pack to obtain superior quality in every piece of Plywood. Both side 100% Calibrated Hippo REGALIA 900 plywood is most dimensionally stable and amazingly durable plywood, which ensures satisfaction for entire woodworking needs for a designer and the house owner.

Every piece of Hippo REGALIA 900 Plywood is made with high grade gurjan wood veneers with each veneer measured at 6.0%moisture content which are stitched to ensure zero core gap and core overlap, the curing process is done using highly viscous resin with a solid content of 60.0 %.

We ensure to retain essential oils found in gurjan wood which offer natural termite protection and waterproofing.

Every Hippo REGALIA 900 plywood is offering maximum Protection, this Plywood is treated with specially formulated chemicals, enabling every inch of Plywood protected from 'Termite and Borer'.
